REPORT NO.

S17206A1-1

DATE

March 27, 2017

<u>CLIENT</u> Web Properties	<u>WEATHER</u> Overcast, 47 degrees
<u>PROJECT SUPERVISOR</u> John Finnegan	<u>PROJECT PROFESSIONAL</u> Tom Black, PE (TBB)
<u>PERSONNEL ON SITE</u> TBB, Andrew Balavage (Budinger)	<u>FIELD REPRESENTATIVE</u> TBB
<u>ACTIVITIES</u> <p>We conducted multiple ground penetrating radar (GPR) surveys along Wandermere Estates lane right-of-way from approximately home address 13803 to 13909. Our scope of work was to attempt to locate potential voids beneath the road that may be present due to an uphill spring and downhill developing landslide. We observed an existing retaining wall on the east side of the street across from home addresses 13803 and 13811. A spring was also present on the east side of the street approximately 50 feet south of the aforementioned retaining wall. GPR surveys did not appear to indicate voids beneath the road.</p> <p>Please let us know if you have questions, comments.</p>	12:30 PM to 5:30 PM <i>Notice: Our firm's professionals are represented on site solely to observe operations of the contractor identified, to form opinions about the adequacy of those operations, and to report those opinions to our client. The presence and activities of our field representative do not relieve any contractor from its obligation to meet contractual requirements. No one except our client may rely on our findings and opinions. The contractor retains sole responsibility for site safety and the methods, operations, and sequences of construction.</i>

THIS DFR IS PRELIMINARY

A preliminary report is provided solely as evidence that field observation was performed. Observations and/or conclusions and/or recommendations conveyed in the final report may vary from and shall take precedence over those indicated in a preliminary report.
